Summary

Software Engineer trained at the SDAIA AI Professionals Bootcamp, with hands-on experience operating the Kingdom Tower digital screen and maintaining network sites for STCS. Built a Saudi stock market forecasting model with a 64% win rate in backtesting, and design interactive dashboards that turn raw data into clear, decision-ready insights.

Skills

AI & Data: Agentic AI Development, Generative AI/LLM Fundamentals, Machine Learning (scikit-learn), Data Analysis (Power BI, Excel) & EDA, Automated Reporting, Time Management.

Software Development: Python (pandas, scikit-learn, numpy), SQL, PHP, JavaScript, HTML/CSS, Streamlit, Plotly, Git, GitHub, MySQL, Bootstrap, jQuery, UI/UX Design, .

Operations & Infrastructure: Digital Advertising Operations, Operational Performance Reporting, Incident Response, Teamwork, Analytical Thinking, Problem Solving, Communication.

Experience

- Hewar Group** — Ad Screen Traffic Executive

March 2025 - March 2026

Saudi Arabia, Riyadh

 - Resolved an average of 35 technical incidents per month on the Kingdom Tower digital advertising screen, maintaining an average response time under 13 minutes and continuous on-screen uptime.
 - Managed end-to-end content scheduling for advertiser campaigns, ensuring accurate and on-time display in line with agreed schedules.
 - Served as the point of contact between clients, advertisers, and internal teams, resolving requests and technical concerns professionally and promptly.
- SDAIA** — AI Professionals Bootcamp

December 2025 - February 2026

Saudi Arabia, Riyadh

 - Core Modules: Python & Tooling, Data Work (ETL/EDA), Machine Learning, Building AI Apps, and Agentic AI with an intensive Capstone Sprint.
- Golden Engineering Company (solutions by stc)** — Junior System Manager

September 2021 - November 2021

Saudi Arabia, Jeddah

 - Supported regional network operations for STCS Managed Router Services across Jeddah, efficiently managing field maintenance for approximately 3 router sites per day.

Projects

- Saudi Stock Market AI Trading Platform (SDAIA)** — Python, scikit-learn, pandas, SQL

 - Pipeline & Modeling: Engineered an end-to-end ML pipeline processing 391,694 price points across 384 Saudi-listed companies (6 timeframes, 20+ indicators); trained Random Forest and Gradient Boosting models across 4 prediction horizons using time-series cross-validation.
 - Strategy & Backtesting: Designed a multi-timeframe trading strategy with 2%-of-capital risk management and a custom backtesting engine, achieving a 64% win rate and 5.23% total return on a simulated 100,000 SAR portfolio.
- Kingdom Tower Screen Operations Dashboard** — Python, Streamlit, Plotly, pandas

 - Independently designed and built a Streamlit operations dashboard with role-based access control across 3 permission tiers (admin, full-access, dashboard), a maintenance ticket logging system with automated CSV/PDF export, and full audit logging for Kingdom Tower's outdoor advertising screen infrastructure.
- Exam Management System** — PHP, MySQL, JavaScript, Bootstrap, jQuery

 - Developed a secure, multi-role (Admin, Teacher, Student) exam management platform with PHP and MySQL, including Excel-based question bank import (Spout) and a responsive Bootstrap interface across all three portals.

Education

- The Technical and Vocational Corporation (TVTC) College of Technology**

Saudi Arabia, Buraydah

Bachelor's degree in Software Engineering. GPA: 4.11/5.00

January 2022 - February 2024

Certifications

- Membership** — Saudi Council of Engineers
- AI Professionals Bootcamp** — SDAIA
- Cybersecurity Analyst Program (CySA+)** — TUWAIQ Academy
- AWS Certified Cloud Practitioner** — Saudi Digital Academy (SDA)

Languages

- English** — Intermediate
- Arabic** — Native
